SKYLINE® PANELS

Unmatched Innovation

These proprietary operating systems are exclusive to Hunter Douglas.

CUSTOM CLUTCH

This standard operating system features customized lift technology for smooth operation and ease of lifting.

ULTRAGLIDE® OPERATING SYSTEM

The retractable cord stays at a constant length after raising and lowering the shade for enhanced child and pet safety.

LITERISE® OPERATING SYSTEM

Offers the ultimate in cordless operation and ease of operation. Simply push to raise or pull down to lower.

POWerview® MOTORIZATION

PowerView Motorization allows users to transform the light and mood throughout a home with the simple push of a button or tap on a mobile device. Through the latest innovations, synchronizing Hunter Douglas window treatments with the rhythm of life has never been easier.

SOFTTOUCH™ MOTORIZATION

New motorized operating system designed for simple, intuitive wand-controlled shade operation. Gently pull wand down to lower shade; push up to raise. Superior child safety with absolutely no exposed cords.

Custom Clutch

SUPERIOR PERFORMANCE

- Two clutch sizes to accommodate all shade sizes.
- Customized spring system based on each individual shade provides an efficient lifting experience. Offering ease of lifting, no matter the shade size.

REFINED FUNCTIONALITY

- Engineered to provide even light gap on the operational side and non-operational side.
- Minimal light gap for increased privacy and light control.

SLEEK, CONTEMPORARY DESIGN

- Standard bracket features nine designer bracket cover colors to coordinate with all fabrics. Standard on outside mount, optional on inside mount.

ENHANCED STYLE

- Upgrade to the Designer Metal Bracket for a sophisticated style statement.
- Available in two designer metallic colors, Pearl Chrome and Burnished Chestnut.

PowerView® Motorization

- Modern design with advanced technology.
- Utilizes the same bracket cover as the Custom Clutch, so it has a very similar look.
- Improved installation and longer heights on fabrics that were previously limited.
- More accurate position of the shade throughout its entire range of motion.
- The light gap is even on both sides of the shade.
- Available with reverse roll.
- Available with Dual Roller bracket.
- Available with Fascia.
- Available with all Cassettes.

Light Control and Privacy

An extensive fabric collection and options give you the ability to control light.

DESIGNER ROLLER SHADES AND DESIGNER SCREEN SHADES

- Fabrics organized by opacity or openness, allowing consumers to choose a fabric that best fits their lifestyle.
- Opacities range from sheer to opaque and 14% to 0% openness.

BLOCKOUT SYSTEM

- Innovative side and sill channels eliminate light gap. Available in all 9 hardware colors and anodized.
- Select from Designer Roller or Designer Screen Shades fabrics.
- Choose from 14 blackout fabrics in the Designer Roller collection for the best light blockage when used with the Blockout system.
- Available with Custom Clutch and PowerView® Motorization with Large Round Cassette or Fascia top treatment.

Dual Roller Shade

The ultimate in light control and privacy.

- Two shades in one.
- Combines fabrics with different opacities on the same shade for varying levels of light control and privacy.
- Each shade operates independently to control light and privacy to preferred setting.
- Bracket version available with Custom Clutch or PowerView® Motorization.
- Large Round Cassette version available with Clutch system only.

Skyline® Panels Patented Hardware

Skyline® Panels offer clean lines and a sleek contemporary look for large or small window expanses.

FEATURES

- Patented two-channel track system allows an infinite number of panels to attach to the slim 2½" headrail.
- Two panel widths promote uniformity, 11½" and 17".
- Minimal stackback for maximized view-through.
- Innovative, interlocking bottom weight prevents panel from tangling and adds panel stability.
- Unique fabric-hanging system provides a tailored look.
- Skyline Panels are available in:
 - › 94 of the 99 fabrics in the Designer Roller Shades collection.
 - › 71 of the 75 fabrics in the Designer Screen Shades collection.

Finishing Touches

Finish shades in style with a variety of top and bottom treatments.

TOP TREATMENTS

- Options for roller shades include Cassette, Fascia, Pocket or the Fabric Valance.
- Skyline® Panels available with Cassette, Sleek Metal Valance, Fabric Valance or Box Valance.

BOTTOM TREATMENTS

- For roller shades choose from a standard bottom bar, flat bottom bar or a sealed hem (screen fabrics only).

COLOR COORDINATION

- Hardware available in nine custom colors, preselected to coordinate with each fabric.
- Select a unique combination for a customized look.

Endless Possibilities

Complete the look in a room with the stand-alone fabric valance.

FABRICS

- Coordinate with a contrasting fabric from the Designer Roller or Designer Screen Shades fabrics.
- Pair with any Hunter Douglas product to add color, pattern or texture.

SUPERIOR CONSTRUCTION

- 2 fabric layers—1 layer of face fabric and 1 layer of room-darkening lining, wrapped around a ½" thick lightweight board.
- Fabric-wrapped returns standard with outside mount. Standard return sizes: 1½", 4" and 6".
- Custom returns available from 2" to 8", in ½" increments.

DESIGNER SCREEN SHADES
SKYLINE® PANELS

The Whole House Solution™

Multi-product styling at its best.

COMPLETE COORDINATION

- Choose two product styles, either Designer Roller Shades + Skyline® Panels or Designer Screen Shades + Skyline Panels.
- Coordinate a single room or an entire home in the same fabric.

Patio Shades

Ideal for covered outdoor spaces, including porches, sunrooms or patios.

FEATURES

- Available with select screen fabrics.
- Each shade features stainless steel components for trouble-free operation.
- The Patio Shade Cable Guide System is designed to secure the shade in an outdoor application.
